DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 4-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: This invention deals with a medical electrical lead comprising an elongated conductor including one or more wires made of a modified MP35N alloy, wherein the alloy comprises less than approximately .001 % titanium by weight (claims 1, 9, & 20). This invention also deals with a medical electrical lead comprising an elongated conductor including one or more wires made of a modified MP35N alloy, wherein the inclusion forming the elements includes gaseous oxygen and nitrogen and the modification includes eliminating the gaseous oxygen and nitrogen under high vacuum conditions (claim 4). This invention also deals with a medical electrical lead comprising an elongated conductor including one or more wires made of a modified MP35N alloy, wherein the one or more wires comprise titanium based inclusions having an average number of 100,00 square inch (claim 14). All of the above claim limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed July 5, 2006 have been fully considered and they are persuasive. Specifically, the applicant's argument that "none of the cited prior art discloses a medical electrical lead comprising an elongated conductor including one or more wires made of a modified MP35N alloy, wherein the alloy comprises less than approximately .001 % titanium by weight, wherein the inclusion forming the elements includes gaseous oxygen and nitrogen and the modification includes eliminating the gaseous oxygen and nitrogen under high vacuum conditions, and wherein the one or more wires comprise titanium based inclusions having an average number of 100,00 square inch", is persuasive and therefore the claims have been allowed.
